

Production Workflow Guide

6 Steps

From concept to carton — every step, clearly defined.

End-to-end steps

Tiruppur

1 Week*

* From Step 1 to sample approval, for buyers who work closely with us.

01

Requirements & Costing

1-2 business days

We review your tech pack or requirements, clarify specs, confirm fabric and finishes, and provide a detailed cost breakdown within 24 hours. No tech pack? We help you build one.

WHAT YOU GET:

Locked specifications, transparent pricing, and a clear production plan.

02

Fabric & Trim Sourcing

2-4 business days

Fabrics sourced from verified mills in Tiruppur. Every lot is GSM-tested before cutting. Swatches sent for your approval before proceeding. Trims, buttons, zippers, and labels matched to your spec.

WHAT YOU GET:

GSM-verified materials from trusted mills, swatch and trim sign-off before production.

03

Sampling & Approvals

2-3 days (sampling)

Proto samples, fit samples, lab dips, and size set samples produced and shared. Samples ready within 2-3 business days once fabric and trims are in hand. Buyers who work closely with us move from Step 1 to sample approval in under a week.

WHAT YOU GET:

Complete sample set for your approval before a single piece of bulk is cut.

Approval depends on buyer location and review speed.

04

Bulk Production

Depends on order quantity

Cutting, stitching, trimming, finishing, and washing executed per approved specs. In-house unit for smaller and faster orders; vetted partner factory network for larger volumes. Daily production updates throughout.

WHAT YOU GET:

Monitored production with daily tracking and milestone updates.

05

Inline QC & Final Inspection

Ongoing + post-production

Checks run throughout production — at cutting, stitching, and finishing. Final inspection covers measurements, visual defects, and AQL-based audit (AQL 2.5 major / 4.0 minor). Third-party and buyer-nominated inspectors welcome.

WHAT YOU GET:

Defect-free output verified at every stage, not just before shipping.

06

Packing & Dispatch

1-2 days after inspection

Garments packed per your exact specifications — poly bags, cartons, assortment, hangtags, and barcodes. Export documentation fully prepared. Shipment coordinated worldwide — Europe, US, Middle East, Australia.

WHAT YOU GET:

Export-ready cartons with full documentation, shipped to your destination.

Thank You for Considering Texcroft.

We look forward to being your manufacturing partner.

From 50 pieces to full-scale production — one team, one standard.
